

CITY OF LODI ELECTRIC UTILITY

Lodi Residential Energy Audit and Direct-Install Program

Lodi Electric Utility (LEU) is pleased to provide residential customers with FREE installation of energy and water saving products. This program is designed to help you save energy and water, and reduce your monthly utility costs. These energy and water saving measures are being fully funded by LEU's Public Benefit Program and Public Works funds. The following products will be available for a limited time while program funds last.

LED Light Bulbs use 80% less energy compared to standard incandescent light bulbs and can last up to fifty times longer. Up to eight energy efficient LEDs will be installed to replace your existing incandescent and halogen light bulbs. Lodi Electric Utility hopes you will enjoy the performance and energy savings of the LED light bulbs for many years. Lodi Electric Utility also offers rebates for LED light bulbs and encourages you to consider LEDs for your future lighting purchases.

High Performance Showerheads deliver a satisfying shower while at the same time reducing water use and saving on your water and sewer costs.

Low-Flow Faucet Aerators - will be installed to reduce water use in kitchen and bathroom sinks.

Thermostatically Controlled Shower Valves monitor the temperature of the water coming out of your showerhead during initial warm-up when you first turn on your shower. When the water reaches 95 degrees, water is reduced to a trickle, reducing wasted hot water (and energy) that normally goes down the drain! When you step into the shower, a simple pull on the lanyard restores the normal flow of water out of your showerhead.

Advanced Smart Power Strips - Do you ever fall asleep watching TV, or leave the house and forget to turn the TV off? No worries! Advanced smart power strips monitor the activity on your TV and automatically turn it off when it is not being watched. Advanced smart power strips can save up to 50% of the energy used by TVs in typical households. Each household will be eligible to receive professional installation of one power strip and instructions on how it works.

Lodi Electric Utility is committed to providing customers the most effective Energy Efficiency and Renewable programs and services. Lodi Electric Utility will use the information our customers provide during the energy audits to continue to develop programs and services to help our customers manage their energy and water use and reduce their utility costs where possible. Program funds are limited, so contact us to sign up today!
